

WIRED WEDNESDAY

Transforming Digital Images & Videos

A new, collaborative platform for creating images, videos, and GIFs

[kapwing.com](https://www.kapwing.com)

- Sign in with Google.
- Click the plus button to start a new project.
 - Start from scratch in the Studio;
 - Use one of 30+ tools to begin your project; or
 - Choose a template.

- Once complete, projects are automatically made public.
- With the FREE version, projects remain in your Workspace for only 7 days, but they can be downloaded and saved.

A Few Extra Options...

www.remove.bg

- Once on the website, click "Select" to choose a picture, or drag / drop one.
- The image will be reproduced with a blank / transparent background.
- You can...
 1. download the image.
 2. edit the image prior to download.

TYPITO

Create engaging videos with beautiful typography, images

<https://typito.com/login>

- Sign up / Login with Google and click "New Project" to start a new video.
- Import your own videos & images OR use the stock ones provided.
- Choose the type of text you want and click to add it.

You can change...

- Add music - to the whole video or each individual clip.
- Add Transitions on the "Media" tab. Be sure they are clicked to "show."
- "Export" it to use. Download video or get a link to share.
- Provides attribution for music used

Good to Know:

*For the FREE Version

- Only create 4 projects per month
- Export projects 4 times per month
- Typito watermark on projects

* Watermark can be a hassle

- * Shared videos count as "1" for each person
- * Can edit after export
- * All videos are private.

YTCROPPER

<https://ytcropper.com/>

Crop videos down to the section(s) you want, then get a shareable link or embed code.

- Copy your YouTube link into the box in the middle of the page.
- Click "Crop!"
- When your video opens, drag the blue buttons / scrubber bars at the bottom to mark the start & end times.
- Click "I am not a robot" then "Crop!"
- You'll see your cropped video, a sharable link, and an embed code.
