To Get Started

- Go to https://ziplet.com
- Click on "Log In" and Login with Google
- Click "Import Class"
- Choose your class & click "Next"
- Choose the class you want to Import from class from Google Classroom list
- Confirm that your students are over 13

For quicker STUDENT responses -

- Go to: ziplet.com/go
- Enter the 6-digit code
- Click "GO!"
- Respond

To Post a Question

First Decide...

Then Choose...

And then...

A few choices you have...

In Google Classroom

Students are prompted to:
- ○ **Sign-in to Ziplet**
- ○ **Click "Launch Ziplet" then sign-in with Google**
- ○ **Choose "Student"**

You provide them the code from your Ziplet dashboard. Then, they can click on the question and respond.

Students can message the teacher from here, too.

Things to Remember

- ‣ You can have more than one response type.
- ‣ Can't change class type (Go vs. Classic) once you've chosen it.
- ‣ Only in "Classic" classes can students message teachers.
- ‣ Students will need a code to get in regardless of whether they have a link or not.
- ‣ You can edit template questions.
- ‣ You can close & then re-open the same question in different "rounds" for data over time.
- ‣ You will get an e-mail overview of the number of questions you've asked and responses you've received.
